Hi everyone. Every time I have participated in this course, the most difficult part for many students is getting started with Git and GitHub. I know how it feels to struggle with this material, because I went through the same thing last year!

To help students with this material, I recorded a series of [11 HD videos \(36 minutes total\) about getting started with Git and GitHub](#). If you are struggling with the course project, or just want to understand Git and GitHub at a deeper level, please take a look. **I demonstrate everything step-by-step.**

If you don't have access to YouTube, you are welcome to download the videos (as mp4 files) from my [Google Drive](#).

If this content is helpful to you, you are welcome to [subscribe to my YouTube channel](#) or check out my [blog](#) for more.

I welcome your feedback and suggestions, and truly hope this is helpful!

Best,
Kevin

Hey Kevin,

I watched these all months ago, before I even signed up for this course. They were incredibly helpful in my work on my company's website using github repositories! Thank you very much!

Best,
Molly

This is really great Kevin. I am actually struggling now especially the commands and nomenclatures, many of which are new to me. Will give feedback when I went through your videos. Thanks a lot.

hii everyone...

i didnt get how exactly to add a new repo in local computer and to push into github....can any one help me?

↑ 0 ↓ · flag

Kevin Markham COMMUNITY TA · 22 days ago 

Hi Sindhu, my [video series](#) may be helpful to you! I suggest that you follow along as I type in each video.

Best,

Kevin

Sindhu Pittu Signature Track · 21 days ago 

hello kevin,

when i create a repo in github,iam getting two repos in github called helloworld.md and helloworld.md~.what is the difference between these two?

↑ 0 ↓ · flag

Kevin Markham COMMUNITY TA · 19 days ago 🔗

Hi Sindhu, I'm sorry, I don't understand your question. Could you provide a link to your repo so that we can take a look?

Thanks,

Kevin

Herman Littlewood Signature Track · 23 days ago 🔗

Videos and PDFs help, but the skip some steps that one has to identify by trial and error or educated guessing.

I am having difficulty in installing GIT on my machine. Followed the steps as provided in the Week 2- Lecture 3 as well as in the Data School YouTube video series provided above. After downloading the files for GIT from the website for my MAC, I get the following notification, which I have attached as a

screenshot. It would be great if someone could please help me get through this installation successfully.

Look forward to hear back from someone soon.

Anjali Bhatara · 22 days ago 🔒

Hi Raj,

If you press "control" and then click on the .pkg at the same time, then select open, you will see the same dialog box pop up but it should give you an additional option to open the file.

Anjali

Raj Singh Rathore Signature Track · 22 days ago 🔒

Thanks a lot Anjali! I made a few changes in the security preferences of my MAC with regards to downloads and was successfully able to download GIT.

Appreciate your timely help though.

Raj

Thanks Kevin, The content depth, & pace are very good. A question though. I watched your video on pushing a file to a repo and followed the steps. It didn't work. I used the github help process & found I had to add these statements after the commit statement:

```
git fetch    then    git merge origin/master.
```

can you explain why you didn't have to do that in yur video??

Thanks, Mel

↑ 0 ↓ · flag

Kevin Markham COMMUNITY TA · 19 days ago 🔗

Hi Milburn, the exact sequence of steps required depends upon what you have done up to that point. I would have to guess that you did one step earlier in the process differently than me. This [video](#) might help to explain.

Thanks,
Kevin

Milburn Crotzer Signature Track · 18 days ago 🔗

Thanks for the response Kevin. Your guess is correct. After my initial push failure, I went on and added another repo. Then, returning to push, my problems seemed compounded. Your videos are a great help. They'll be my reference base as I continue the plunge into this course.

Bharat Ananth Signature Track · 21 days ago 🔗

Hi Kevin,

I appreciate all your help and contribution to make our learning experience easier and so much fun. I had heard about git and github as my team uses it regularly, but I didn't have to use it till now, so it was all new to me. Your youtube channels and dataschoo1 videos were excellent source of information and made learning those so much simpler. Thank you very much!

I subscribed to your channel and keep referring to those videos often.

Thanks

Bharat
